EDUCATION

New York City College of Technology

Brooklyn, NY

Bachelor of Technology, Computer Systems, GPA: 3.6

Expected: 2027

- Relevant coursework: Computer Programming and Problem Solving, Programming Fundamentals, Database System Fundamentals, Web Programming

SKILLS

- Languages: Python, HTML, CSS, Java, JavaScript, C++
- Software: Visual Studio, GitHub, git
- Creative thinking and collaboration, working with groups

PROJECTS

Restaurant Website | HTML, CSS, JavaScript, Git

- Using HTML elements to structure multiple pages, enabling easy navigation across the site.
- Using CSS to style the various pages and learning how to use CSS grid to be able to arrange multiple images in one container.
- Using JavaScript, developed interactive buttons for the order, gift card, and reviews page, ensuring buttons performed specific functions; used `forEach` to organize button functionality for shared classes.
- Gained proficiency in Git to manage project development across different devices, allowing for collaborative work between school and work.

Secret Santa | Python

- Secret Santa program that takes data from the user to output randomized pairs
- Program uses algorithms to make sure users do not get themselves as a secret Santa
- Utilized the Turtle graphics library to draw a Christmas box on the screen
- Created visual appeal by using different colors for the elements of the program

Terminal game | Python

- Created a small story game with premade choices for the user to pick
- Used the Random library to deal different amounts of damage and to pick random opponents for the user

EXPERIENCE

Maspeth Town Hall inc.

02/2023 - Present

Counselor

- Work with employees in pairs or groups to watch and help groups of children with math, reading, and writing homework
- Use stem materials for activities with children
- Help supervisors with setting up activities, executing activities, and cleaning up after activities

CERTIFICATES

- HTML Course certificate (2024)
Online course - Codedex.io
- Python Course certificate (2023)
Online course - Codedex.io
